How AMDRO® Fire Ant Bait Works:

1. AMDRO® is a bait. Worker ants carry it into the mound as food for the colony.
2. They eat it and feed it to the queen. AMDRO® starts to kill ants immediately.
3. In about a week the queen is dead, which destroys the mound.

Cómo funciona el cebo para hormigas de fuego AMDRO®:

1. AMDRO® es un cebo. Las hormigas obreras lo transportan a su hormiguero como alimento para la colonia.
2. Las hormigas lo comen y alimentan a la reina con el cebo. AMDRO® comienza a eliminar a las hormigas de inmediato.
3. La reina muere en aproximadamente una semana, lo cual destruye el hormiguero.
